DESCRIPTION

In its previous life, this building had a covered upstairs that was used for storage and it has a footprint of approximately 220m². One option is to use this to create a new home or perhaps 6 apartments over 2 floors - although please note that the structural condition and stability need verifying. Another option is to demolish the existing structure and rebuild, subject to a restricted footprint of 120m², but this could still give you a stunning home or 4 apartments over 2 floors. Whichever you choose, look forward to the potential for a great return on your investment.

Note: the land is situated in a medium risk flood zone.
